Occupational diseases and occupational accidents: a closer look - FAT, 2010

http://www.faofat.fgov.be/site_fr/fat/forum_europeen/documents/2012135_ArtikelFBZFASoversieen.pdf

This publication provides an overview of the way the sector of occupational diseases and occupational accidents is organized and financed. It explains how workers are insured against occupational diseases and occupational accidents, against what risks, how and when they have to declare an occupational disease or an occupational accident, to which benefits the victims or their rightful claimants are entitled and how these benefits are being calculated.

Also available in French: http://www.faofat.fgov.be/site_fr/fat/forum_europeen/documents/2012134_ArtikelFBZFAS.pdf

A new instrument for combating occupational accidents in Belgium: annual selection of higher-risk companies - FAT, 2011

http://www.faofat.fgov.be/site_fr/fat/forum_europeen/documents/2012137_articleRAforumeuropeenv3_000.pdf

In order to combat occupational accidents, the Fund for occupational accidents annually identifies companies where there is a particularly high risk of accidents compared with businesses carrying out similar activities. This publication describes how those companies are being selected, why and how the initial selection procedure has been adapted, how the selected companies can defend themselves and how these companies roll out an action plan in a bid to improve the situation.

Also available in French: http://www.faofat.fgov.be/site_fr/fat/forum_europeen/documents/2012136_articleRAforumeuropeenv3_000.pdf

Trends in the Belgian occupational accidents branch - FAT, 2012

http://www.faofat.fgov.be/site_fr/fat/forum_europeen/documents/2012141_ArticlestatistiquesAT.pdf

The number of occupational accidents is inherently related to the level of employment. This document provides an overview of the evolution of the number of occupational accidents in relation to the changes in employment in the different sectors of activity since 1985. It focuses in particular on the impact of the economic crisis since 2008.
