FORUM NEWS

Activities of the Working Groups

Working Group Communication

The Working group mandated by the European Forum met in Helsinki, taking advantage of the meeting organised by TVK from 7 to 9 June 2023.

Working group Communication

Since its creation, this group has been led by AUVA's International Relations Department. In particular, Nikolaus Schaden-Kajoui has taken over from Amra Causevic, who is on maternity leave.

The group is responsible for the publication of Forum News as well as the LinkedIn and Twitter accounts.

Forum News

The publication, which is now available in electronic format only, is distributed twice a year, with two difficulties: feeding the content and distributing the newsletter more widely than just to Forum members.

To overcome the first problem, it was decided to devote the summer issue to the conference organised by the Presidency and to the pro-

gress of work within the groups, and the second issue, published in December, to news from member organisations on the usual topics: prevention, insurance, conferences, etc.

"We need your support", said Nikolaus. Without information, there can be no newsletter, and "the more members participate, the more interesting the newsletter will be". So, it's vital that everyone takes part and sends in information.

Social networks

The LinkedIn account (<https://www.linkedin.com/company/european-forum-of-the-insurance-against-accidents-at-work-and-occupational-diseases/>) was created in 2022. Here again, it's important to share information about the members. ●
